Delivery & Customer Satisfaction

Comparing customer reviews between on-time and late deliveries

State

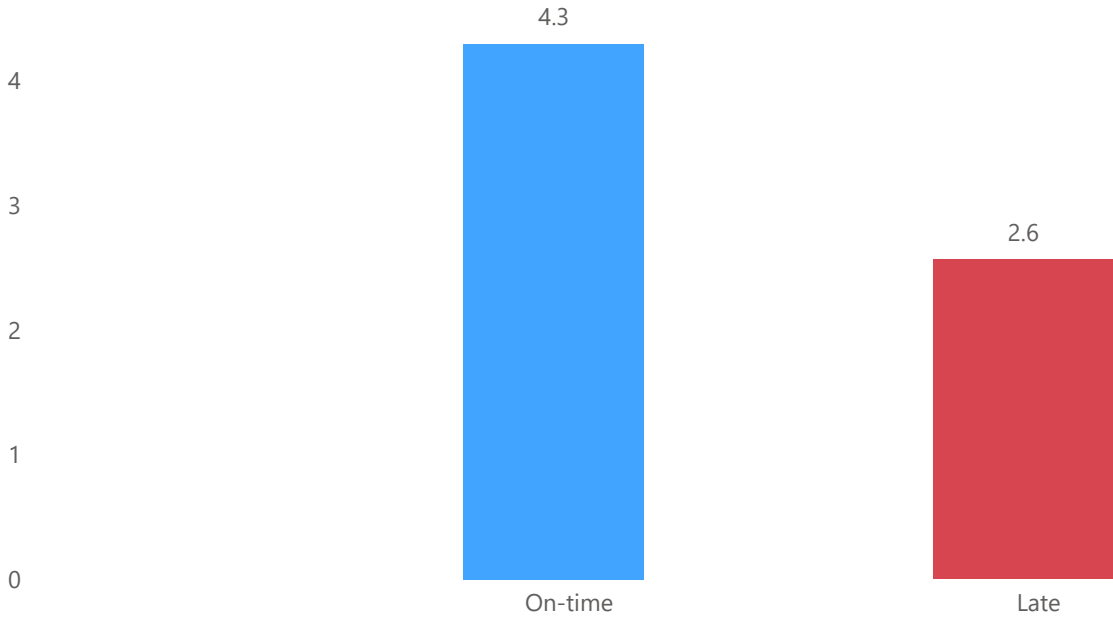

All

Category

All

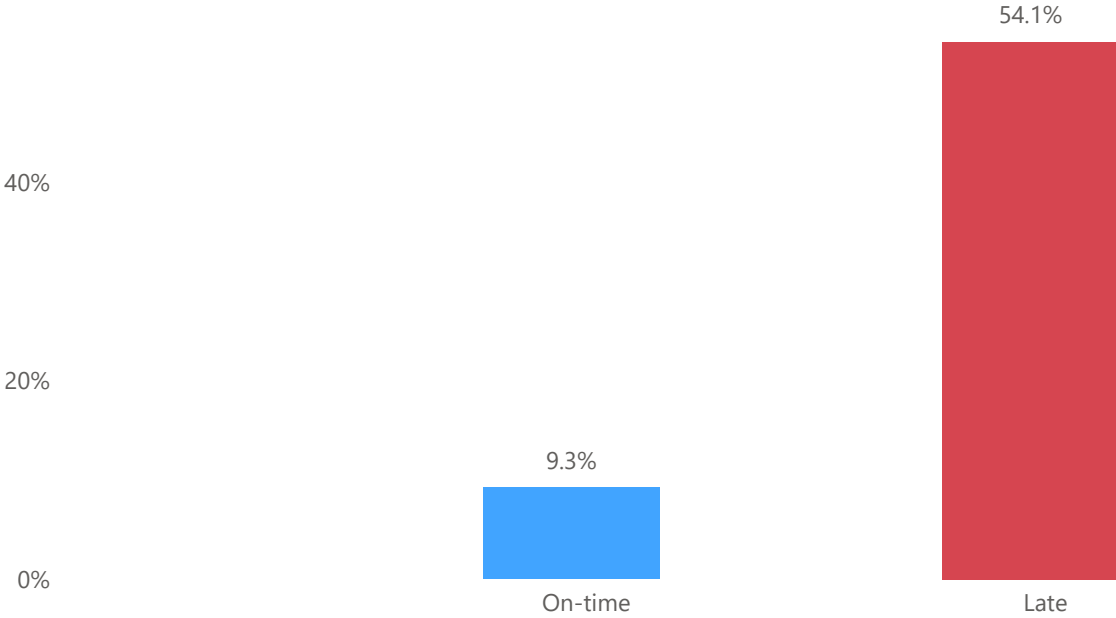

Avg review score — on-time vs late

Lower score = worse customer experience

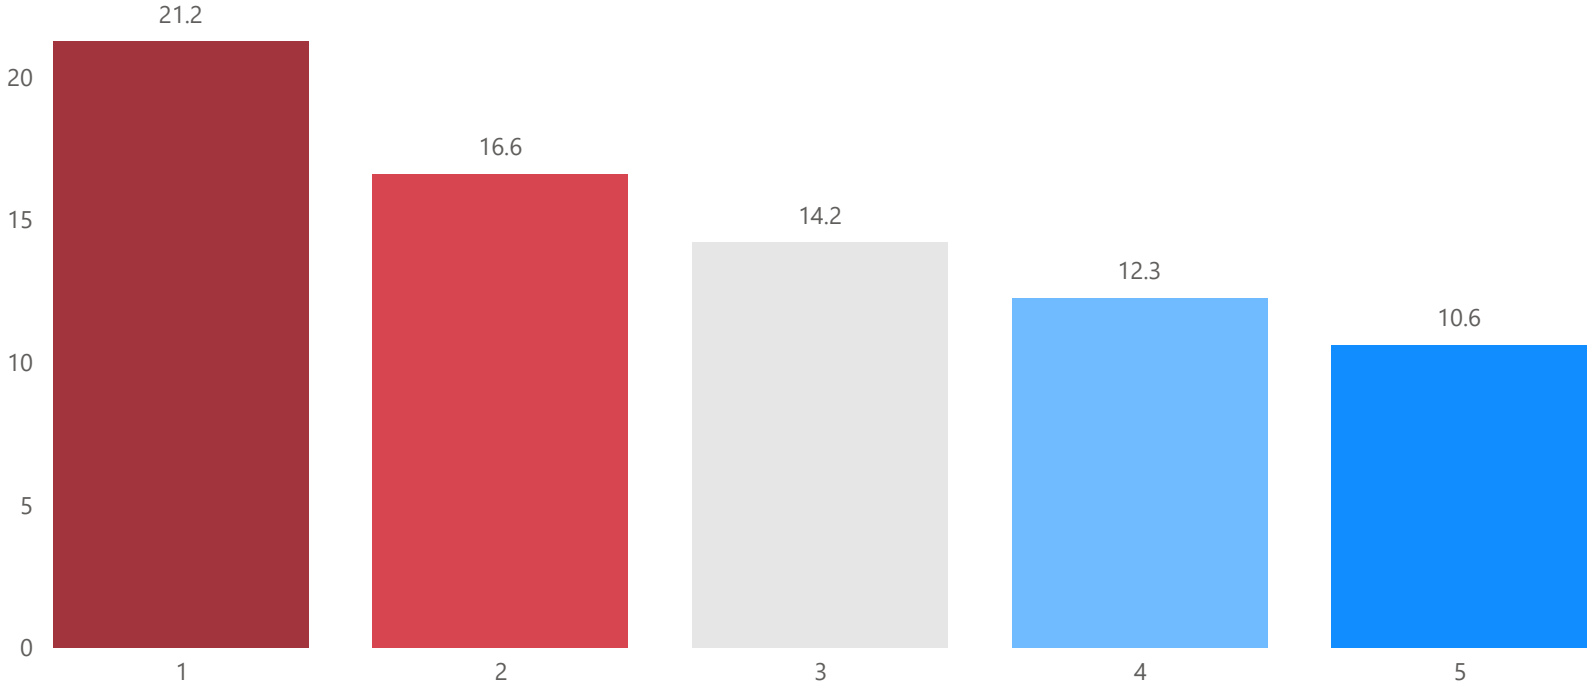

Low review rate — on-time vs late

% of orders receiving 1–2 star reviews

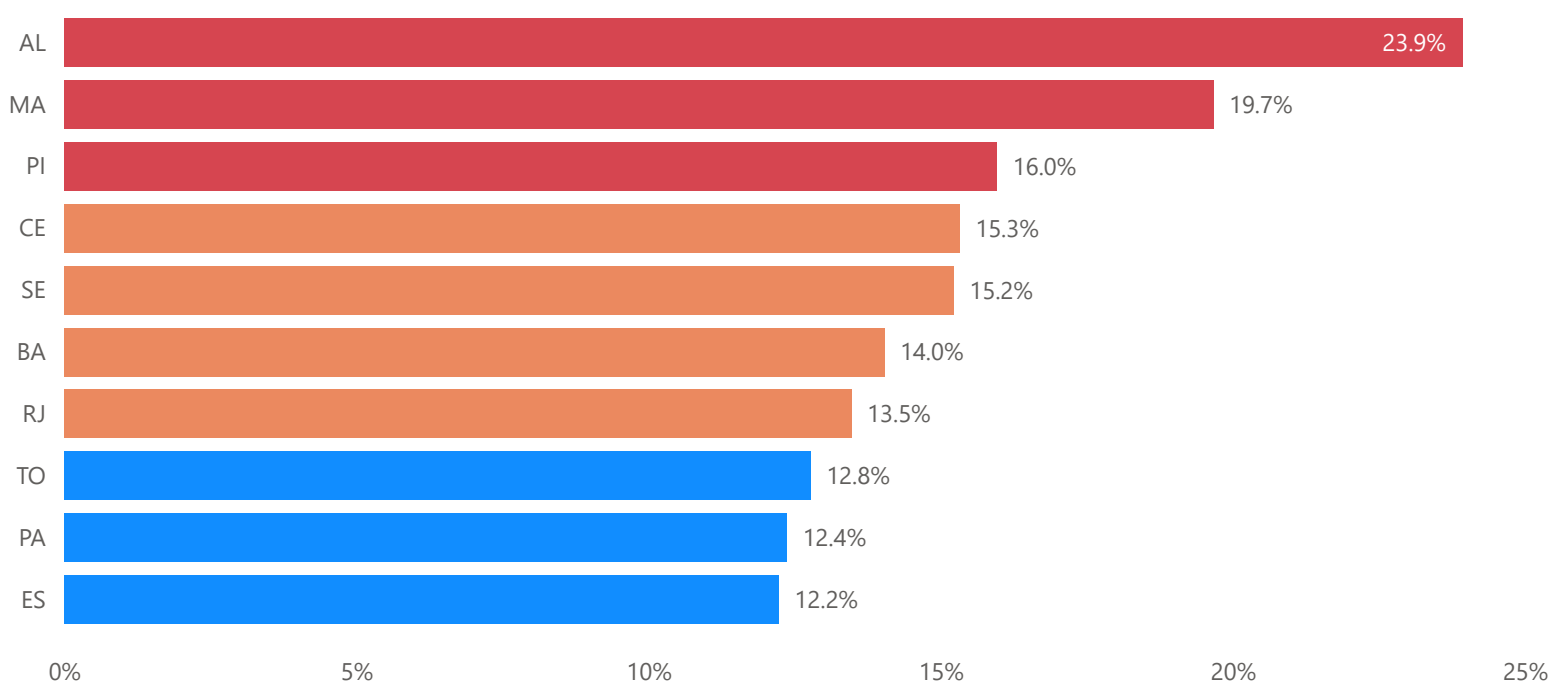

Avg delivery days by review score

1-star orders take twice as long as 5-star orders

Late delivery rate by state — top 10

% of orders arriving after estimated date

Where to Improve

Prioritising product categories with weaker customer experience and business impact

State

All

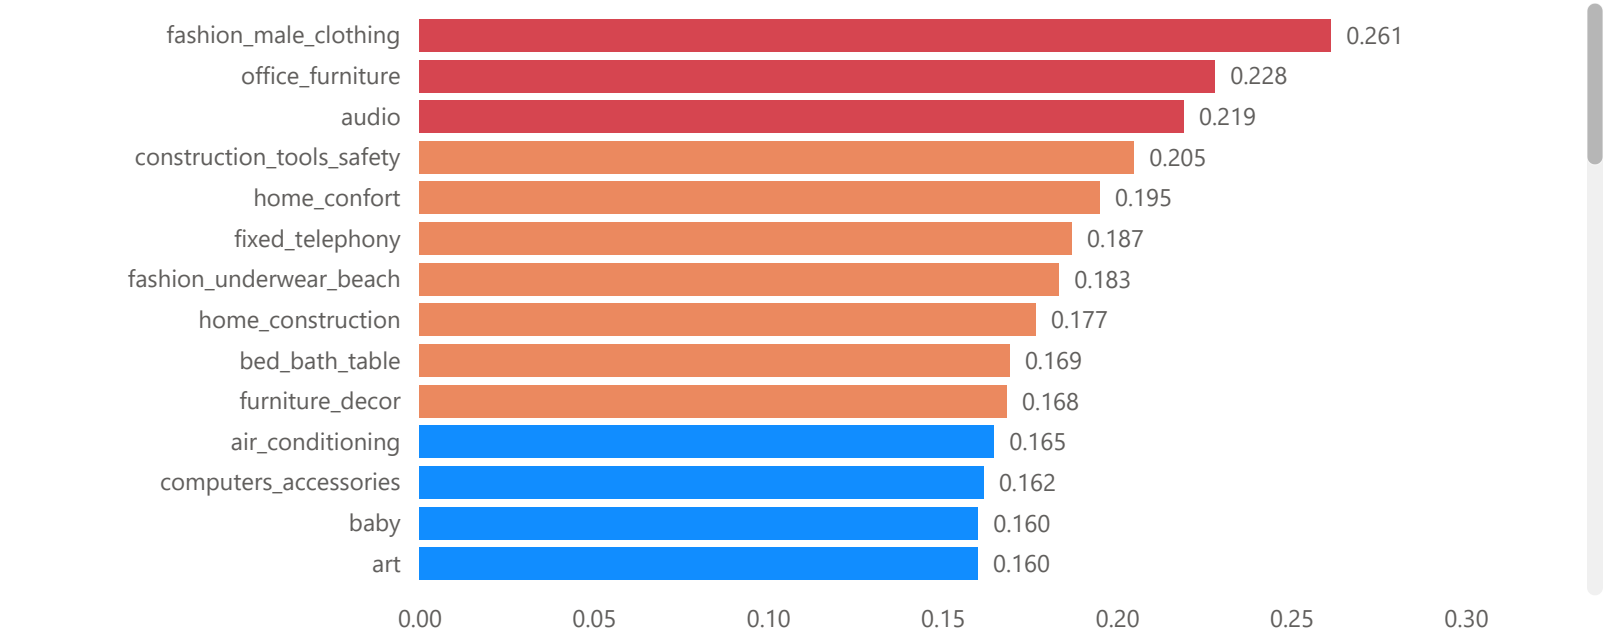

Category

All

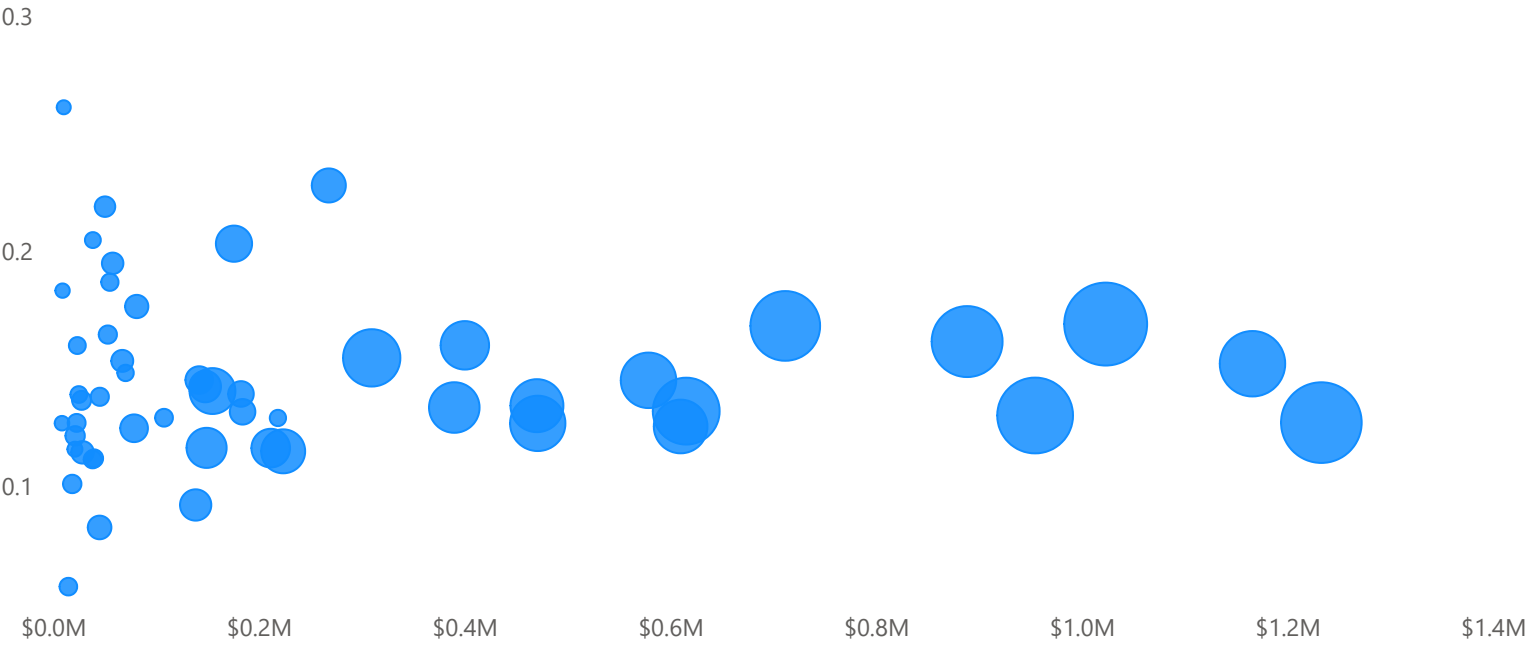

Category Low Review Rate Overview

Only categories with more than 100 reviewed orders are included

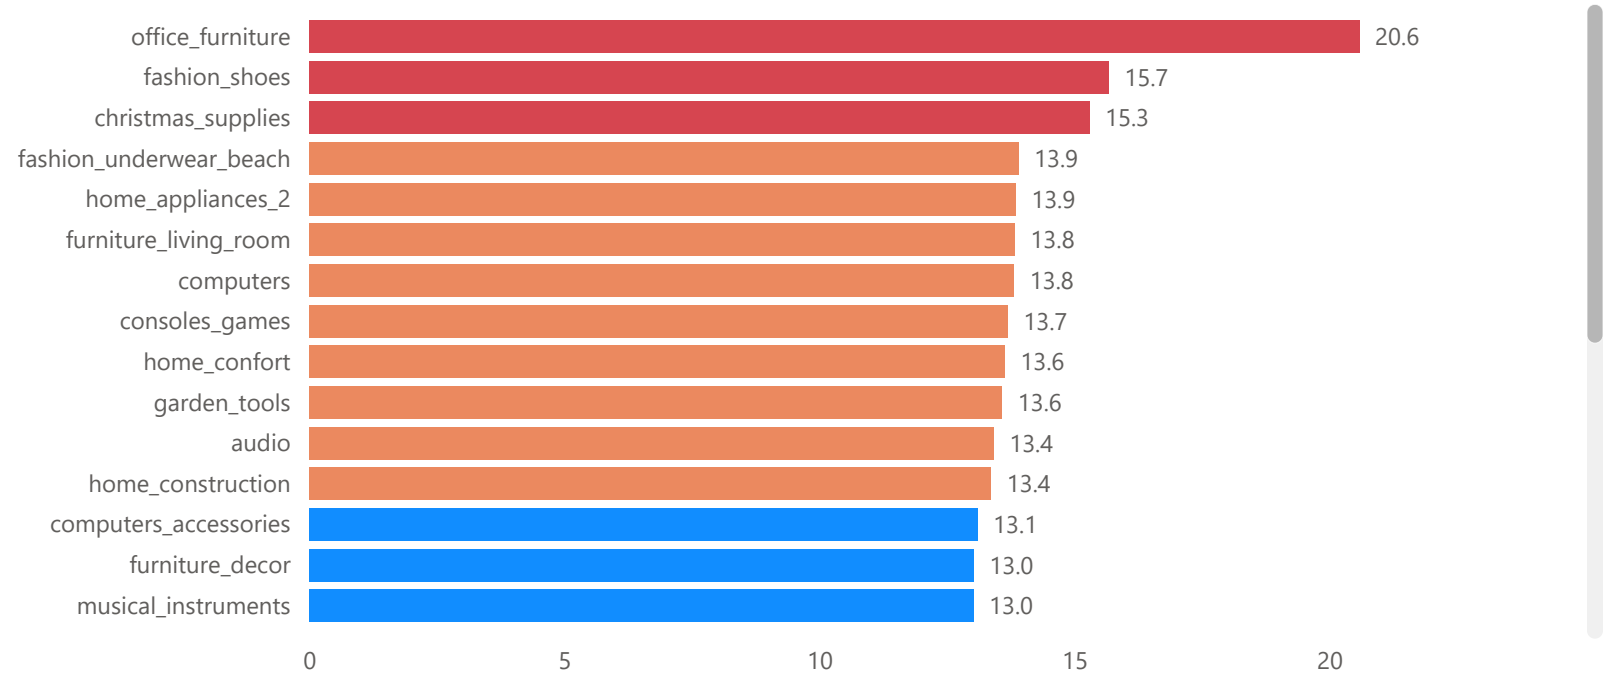

Revenue vs Low Review Rate

Higher low-review rates are mostly seen in lower-revenue categories. Hover for category details.

Categories with Longer Delivery Time

Only categories with more than 100 reviewed orders and above-average delivery time are included

Priority Actions

- Prioritise categories with high low-review rates and enough review volume.
- Review revenue-generating categories with weaker customer satisfaction.
- Investigate categories with longer delivery times for fulfilment or logistics issues.
- Monitor Low Review Rate and Average Delivery Days regularly to track customer experience performance.
